

Lucy

This space craft was launched by NASA on October 16, 2021. It will survey the asteroid belt and the asteroids around Jupiter

One the asteroids It has successfully found and took a photo was Dinkinesh

TAVEL

Time:

It should take about a month

Distance:

It is 4.2 AU (390.4 million miles)

What do I Pack?:

We recommend bringing warm clothes because it will be cold. Anything like hygiene will be provided

How will we get there?

We will leave on a modified space ship for fast travel

Hermes Flights

Space Flight Done Right

Fun Fact: The word astoid comes for the Greek word Starlike

History

Ceres

It was the first asteroid to be discovered in the asteroid belt by Giuseppe Piazzi in 1801

Fun Fact

- 1.) The group that can name an asteroid is called International Astronomical Union's
- 2.) Trojans: Are steroids the fly off orbit from Jupiter and then obit the sun

Sights

On the Sigtht tour you will be able to walk around and jump off the asteroids

What will I see?

- Jupiter
- Mars
- Stars
- Sun

Weather

The weather in the asteroid is different with it having no atmosphere

Temperature

- -99.4 to -162.4 °F
- Solar Flares

Calender

- Earth Years: 4.61
- Earth Day: 9 hr
